- Start time and torsion can be adjusted for starting motor smoothly.
- The soft start can choose 4 starting models : total pressure starting, gradient starting, constant current starting, torque starting.
- It's controlled by SCR without access point, arc, and abrasion of light end, as semi-permanent use-life.
- Easy wiring : the equipment of 3 in and 3 out, it can save the cost of labor wiring tedious.
- This controller is 3 phases, 3 wires, 6 SCR thyristors for controlling by power.
- This starter is micro-treater with auto revising of light/heavy loading and the control of torque.
- This controller has CT electronic inspection protector : the OL series have the protection of overload, loss phase, motor block, motor low load, over heating high sensitivity.
- Motor overload and motor stuck can be setting by controller's internal DIP switch. and also can be hand reset by reset button.
- This controller offers 3 sets output connection : output connection of starting, output connection after running (BY PASS), output connection of system exception.
- The EMC Directive 2014/30/EU.
- Low Voltage Directive : 2014/35/EU.
- This starter meets the standard of CE Certificate, EN/IEC 60947-1, EN/IEC 60947-4, EN/IEC 61000-6-4, EN/IEC 61000-4-2, EN/IEC 61000-4-4, EN/IEC 61000-4-6, EN/IEC 61000-6-2 approved.
